ABOUT US

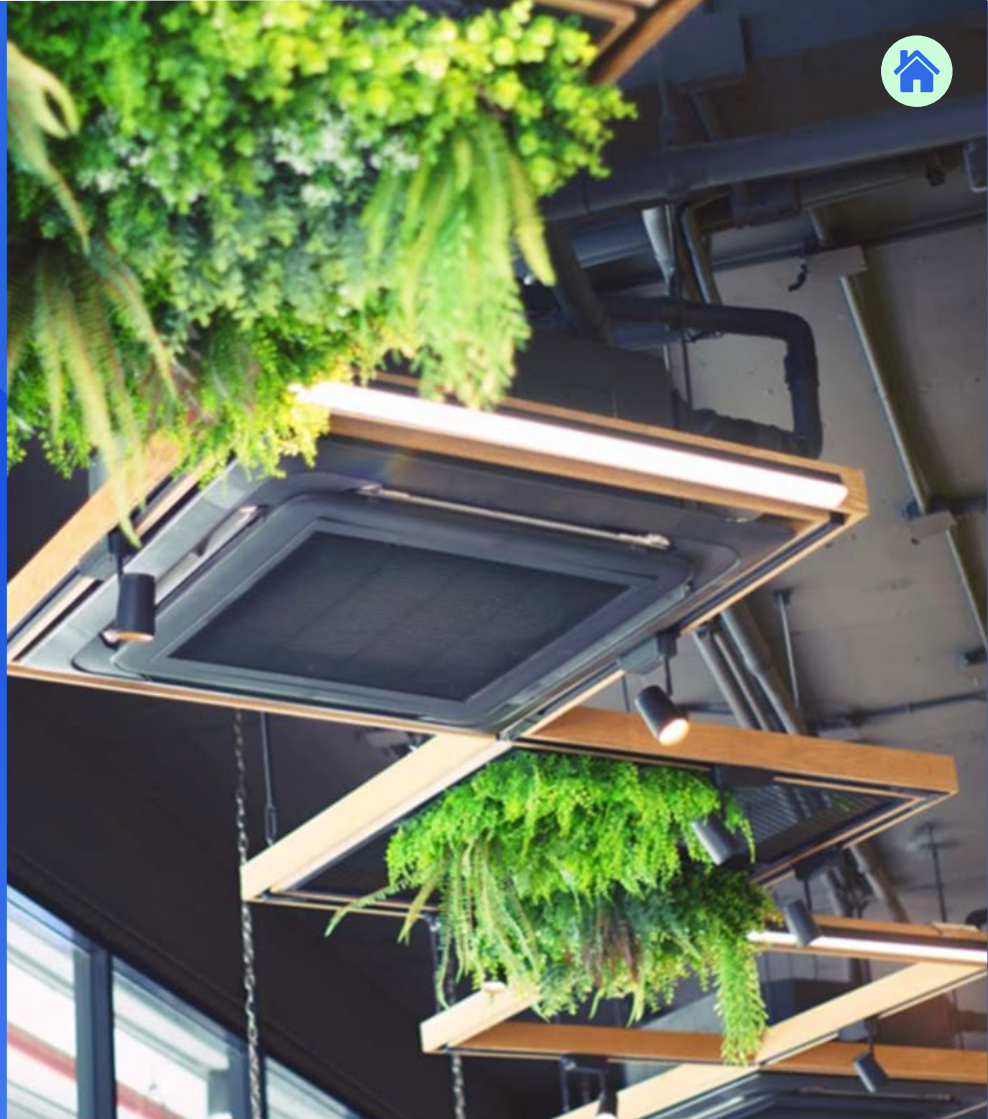

Cold Skill is an HVAC contractor and procurement company specialist for Air conditioning and refrigeration. Cold Skill designs, installs and maintains advanced cooling systems to help people do better work and live better lives. We serve the whole of England, tackling projects of all sizes, from comms rooms, small shops & offices, hotels, schools, colleges and large commercial developments. We use our technical expertise and meticulous attention to detail to deliver quality service. Our objective is to provide advanced products and services with cost-effective, efficient, and reduced maintenance costs that will exactly meet our customer's expectations.

AIR CONDITIONING INSTALLATION

Our complete air conditioning installation service normally starts with one of our experts visiting you at your premises to discuss your air conditioning requirements. In developing our proposals, we will take account of a wide range of criteria such as:

- The size and shape of the space to be temperature-controlled
- Your current and potential future use of the space
- Heat loads from occupants, equipment and any other sources which must be controlled
- Special features of your premises, your activities, or other requirements you may have

PEACE OF MIND

To give you complete peace of mind, all our air conditioning installations include our dedicated project management service. Your Project Manager will coordinate the activities of our fully qualified air conditioning installation engineers, keep you fully informed of progress and ensure any effect on your day-to-day operations is kept to an absolute minimum. We understand that every air conditioning installation project is unique, so our tailor-made proposals and quotations cover everything you need — all free of charge and without obligation.

OUR COMMITMENT

At Coldskill Air Conditioning Services we are experts in the design, installation, and repair of all types of fixed air conditioning systems, combining a full nationwide capability with the kind of friendly and cost-effective service you might expect from much smaller companies.

No matter what type of space you have, or what environment you are seeking to create. We're sure there's a Cold Skill Air Conditioning solution that's right for you.

QUALITY EQUIPMENT

All Coldskill Air Conditioning installations use equipment only from leading air conditioning manufacturers – including Panasonic, Daikin – and incorporate all the very latest technology to ensure your air conditioning delivers the benefits of low energy consumption, super-silent operation and a long, trouble-free life.

We want to make sure your air conditioning installation investment is as cost-effective as possible.

Therefore, as part of our quotation, Coldskill Air Conditioning will show you how to obtain valuable financial assistance such as government-backed tax deductible capital allowances and other payment options.

Don't forget, modern air conditioning isn't just for cooling. Our systems also incorporate the latest reverse-cycle heat pump technology which, as well as providing effective summer cooling, delivers highly effective and energy-efficient winter heating by cleverly harnessing the free energy of the ambient air.

WHICH IS THE BEST FOR ME?

When you come to choosing your air conditioning system, there is a wide range of options with different price ranges and varying functionality.

Cold Skill uses only those brands we trust for reliability, performance and value for money. Although we fit many other brands, here are our tried and trusted favourites:

Panasonic is one of the leading brands in air conditioning, innovative and to the forefront of technology, but still offers competitive prices. Recommended split-units from Panasonic include:

[See Units](#)

Panasonic **AERO SERIES**

Standard Inverter

A wall mounted system with a modern white design, that includes state-of-the-art Wi-Fi control as standard.
